SUBJECT INDEX

Abomasum
An excitatory body–antral reflex in the sheep abomasum. **77**, 565, 1992

Acetylcholine
Inhibition in the rat of nitric oxide synthesis *in vivo* does not attenuate the hypotensive action of acetylcholine, ATP or bradykinin. **77**, 285, 1992

ACPD stereoisomer
Evidence for presynaptic depression of monosynaptic excitation in neonatal rat motoneurones by (1S,3S)- and (1S,3R)-ACPD. **77**, 529, 1992

Action potential
Rate dependence of action potential duration and calcium current in isolated guinea-pig cardiocytes. **77**, 615, 1992

Adenosine triphosphate (ATP)
The G.L. Brown Prize Lecture. Potassium channels, metabolism and muscle. **77**, 1, 1992

Adipose tissue
Prostaglandin E_2 in adipose tissue extracellular fluid of sheep. **77**, 363, 1992

β-Adrenergic agonist
Effects of the β-adrenergic agonist, ritodrine, and insulin on plasma potassium concentrations in fetal lambs. **77**, 637, 1992

Albumin
Avoidance of endotoxin-induced inflammation during studies of albumin clearance from caprine joints. **77**, 839, 1992

Aldosterone
Inhibition of vasopressin and aldosterone release by atrial natriuretic peptide in conscious rabbits. **77**, 587, 1992

Almitrine bismesylate
Characteristics of augmented breaths provoked by almitrine bismesylate in cats. **77**, 109, 1992
An analysis of the action of an analogue of almitrine bismesylate in the rat model of hypoxic lung disease. **77**, 819, 1992

Ammonia
Involvement of carbonic anhydrase in ammonia flux across rumen mucosa *in vitro*. **77**, 517, 1992

Angiotensin antagonist
Intracerebroventricular angiotensin II-induced thirst and sodium appetite in rat are blocked by the AT_1 receptor antagonist, Losartan (DuP 753), but not by the AT_2 antagonist, CGP 42112B. **77**, 761, 1992

Antral motility
An excitatory body–antral reflex in the sheep abomasum. **77**, 565, 1992

Artery
The effect of luminal flow in rabbit carotid artery on transmural fluid transport. **77**, 553, 1992

Arthritis
Position sense at the proximal interphalangeal joint is distorted in patients with rheumatoid arthritis of finger joints. **77**, 675, 1992

Atrial natriuretic peptide
Inhibition of vasopressin and aldosterone release by atrial natriuretic peptide in conscious rabbits. **77**, 587, 1992

Atropine
Cholinergic mechanisms for secretin release after intraduodenal alkalinization in the anaesthetized rabbit. **77**, 601, 1992

Autoradiography
Regional characteristics of intestinal iron absorption in the guinea-pig. **77**, 177, 1992

Axon reflex
An investigation into the extent to which flare in human skin crosses the mid-line. **77**, 765, 1992

Bat
Effect of stage of lactation and milk accumulation on mammary cell differentiation in lactating bats. **77**, 873, 1992

Bicarbonate
Influence of extracellular bicarbonate on the short-circuit current and intracellular free calcium of human cultured sweat duct cells. **77**, 863, 1992

Blood flow
The effect of luminal flow in rabbit carotid artery on transmural fluid transport. **77**, 553, 1992

Blood pressure
Effect of cortisol on blood pressure and vascular reactivity in the ovine fetus. **77**, 709, 1992

Book reviews

Retrospectroscope: Insights into Medical Discovery, by J. Comroe Jr. **77**, 537, 1992

Clinical Voice Disorders: An Interdisciplinary Approach, 3rd edn. by Arnold E. Aronson. **77**, 537, 1992

Mechanisms in Blood Coagulation, Fibrinolysis and the Complement System by Torben Halkier. **77**, 661, 1992

Neurobiology of Opioids edited by O.F.X. Almeida & T.S. Shippenberg. **77**, 661, 1992

New Techniques of Optical Microscopy and Microspectroscopy edited by Richard J. Cherry. **77**, 769, 1992

Bradykinin

Rapid stimulatory effect of bradykinin on glucose transport across the brush-border and basolateral membranes of rat jejunal enterocytes. **77**, 913, 1992

Breathing

Characteristics of augmented breaths provoked by almitrine bismesylate in cats. **77**, 109, 1992

Brush-border membrane

Regional characteristics of intestinal iron absorption in the guinea-pig. **77**, 177, 1992

Calcitonin gene-related peptide

Voltage-sensitive elevation of cytosolic in guinea-pig cardiac myocytes elicited by calcitonin gene-related peptide. **77**, 925, 1992

Calcium

Osteoclasts from medullary bone of egg-laying Japanese quail do not express the putative calcium 'receptor'. **77**, 501, 1992

Rate dependence of action potential duration and calcium current in isolated guinea-pig cardiocytes. **77**, 615, 1992

The effect of $_i$ and $_o$ on Ca^{2+} mobilization in the rat aortic smooth muscle cell line A7r5. **77**, 627, 1992

Influence of extracellular bicarbonate on the short-circuit current and intracellular free calcium of human cultured sweat duct cells. **77**, 863, 1992

Voltage-sensitive elevation of cytosolic in guinea-pig cardiac myocytes elicited by calcitonin gene-related peptide. **77**, 925, 1992

Calcium channel

Effects of intracellular ATP on calcium current in freshly dispersed single cells of guinea-pig portal vein. **77**, 719, 1992

Calcium current

Modulation of voltage-dependent calcium current in *Helix aspersa* buccal neurones by serotonin and protein kinase C activators. **77**, 891, 1992

Calcium current inactivation

Inactivation of Ca current during the action potential in guinea-pig ventricular myocytes. **77**, 153, 1992

Calcium fluctuation

Actions of the phorbol ester, PMA, on ATP-induced fluctuations in cytoplasmic calcium in single isolated bovine aortic endothelial cells. **77**, 657, 1992

Calcium oscillation

Calcium oscillations in single isolated human vascular smooth muscle cells. **77**, 205, 1992

Calcium paradox

Is there a calcium paradox in isolated bovine aortic endothelial cells? **77**, 393, 1992

Calcium release

Evidence for Na^{2+}–Ca^{2+} exchange and Ca^{2+}-induced Ca^{2+} release in a cultured vascular smooth muscle cell line from the rat. **77**, 141, 1992

Capillary filtration

Evidence for simultaneous bidirectional fluid flux across synovial lining in knee joints of anaesthetized rabbits. **77**, 513, 1992

Capsaicin

Cholecystokinin-induced c-*fos* expression in the rat brain stem is influenced by vagal nerve integrity. **77**, 225, 1992

Pathobiological reactions of C-fibre primary sensory neurones to peripheral nerve injury. **77**, 405, 1992

Carbonic anhydrase

Involvement of carbonic anhydrase in ammonia flux across rumen mucosa *in vitro*. **77**, 517, 1992

Cardiac action potential

Inactivation of Ca current during the action potential in guinea-pig ventricular myocytes. **77**, 153, 1992

Cardiac fibroblast

Mechanosensitive cells in the atrium of frog heart. **77**, 213, 1992

Cardiac muscle

Intracellular pH changes induced by hypoxia and anoxia in isolated sheep heart Purkinje fibres. **77**, 165, 1992

Polyol pathway-mediated changes in cardiac muscle contractile properties: studies in streptozotocin-diabetic and galactose-fed rats. **77**, 829, 1992

Cardiac myocyte

Voltage-sensitive elevation of cytosolic in guinea-pig cardiac myocytes elicited by calcitonin gene-related peptide. **77**, 925, 1992

Cardiac nerve

Heart rate changes evoked by hypoxia in the anaesthetized, artificially ventilated cat. **77**, 271, 1992

Cardiac sphincter

Evidence for involvement of nitric oxide in the non-adrenergic non-cholinergic (NANC) relaxation of human lower oesophageal sphincter muscle strips. **77**, 509, 1992

Cardiovascular reflex
Reflex effects on the coronary circulation. **77**, 243, 1992

Cat
Modulation by peripheral conditioning stimuli of the responses of trigeminal brain stem neurones and of the jaw opening reflex to tooth pulp stimulation in chronically prepared, anaesthetized cats. **77**, 343, 1992
Electrophysiological influences of the parietal cortex and dorso-medial thalamic nucleus on the prefrontal cortex of the cat. **77**, 351, 1992

Catecholamine
Heart rate changes evoked by hypoxia in the anaesthetized, artificially ventilated cat. **77**, 271, 1992

Cell culture
Electrical resistances of cultured bovine arterial endothelium in solutions of various resistivities. **77**, 741, 1992

c-*fos*
Cholecystokinin-induced c-*fos* expression in the rat brain stem is influenced by vagal nerve integrity. **77**, 225, 1992

Chemoreceptor
Effect of potassium on ventilation in the rhesus monkey. **77**, 217, 1992
Heart rate changes evoked by hypoxia in the anaesthetized, artificially ventilated cat. **77**, 271, 1992

Chloride–bicarbonate exchange
The effects of Na^+–K^+–Cl^- co-transport and Cl^-–HCO_3^-–exchange blockade on the membrane potential and intracellular chloride levels of rat arterial smooth muscle, *in vitro*. **77**, 857, 1992

Cholecystokinin
Interaction between secretin and cholecystokinin-octapeptide in the exocrine rat pancreas *in vivo* and *in vitro*. **77**, 191, 1992
Cholecystokinin-induced c-*fos* expression in the rat brain stem is influenced by vagal nerve integrity. **77**, 225, 1992
The role of cholecystokinin in inhibition of gastric emptying by peptone in the rat. **77**, 693, 1992

Cholesterol
Exercise-induced cholesterol depletion and Na^+, K^+-ATPase activities in human red cell membrane. **77**, 933, 1992

Chondrocyte
Measurement of intracellular pH in isolated bovine articular chondrocytes. **77**, 521, 1992

Collecting duct
Primary culture of collecting duct cell epithelium from neonate rabbit kidney in monolayer. **77**, 129, 1992

Colon
Non-adrenergic, non-cholinergic inhibitory responses to nerve stimulation in rat colonic circular muscle. **77**, 119, 1992

Computer reconstruction
The determination of short-term breast volume changes and the rate of synthesis of human milk using computerized breast measurement. **77**, 79, 1992

Confocal microscopy
Confocal analysis of fluorescent bead uptake by mouse Peyer's patch follicle-associated M cells. **77**, 929, 1992

Contraction
The effect of $_i$ and $_o$ on Ca^{2+} mobilization in the rat aortic smooth muscle cell line A7r5. **77**, 627, 1992

Coronary blood flow
Reflex effects on the coronary circulation. **77**, 243, 1992

Coronary flow
Coronary flow and left ventricular pressure during diastole in the anaesthetized dog. **77**, 397, 1992

Cortisol
Effect of cortisol on blood pressure and vascular reactivity in the ovine fetus. **77**, 709, 1992

Co-transport
The effects of Na^+–K^+–Cl^- co-transport and Cl^-–HCO_3^-–exchange blockade on the membrane potential and intracellular chloride levels of rat arterial smooth muscle, *in vitro*. **77**, 857, 1992

Cytoplasmic bridge
Cytoplasmic bridges and gap junctions in an insect cell line (*Aedes albopictus*). **77**, 903, 1992

Dehydration
Prolactin secretion in sheep after dehydration followed by restraint or administration of ovine corticotrophin-releasing factor. **77**, 357, 1992

Diabetes
A diet enriched in essential fatty acids protects against the loss of lymphocytes which occurs in rats suffering from streptozotocin-induced diabetes. **77**, 185, 1992
Polyol pathway-mediated changes in cardiac muscle contractile properties: studies in streptozotocin-diabetic and galactose-fed rats. **77**, 829, 1992

Duodenal alkalinization
Cholinergic mechanisms for secretin release after intraduodenal alkalinization in the anaesthetized rabbit. **77**, 601, 1992

Eccentric exercise
The protective effect of damaging eccentric exercise against repeated bouts of exercise in the mouse tibialis anterior muscle. **77**, 757, 1992

Electric field
Electric field-induced orientation of rat hippocampal neurones *in vitro*. **77**, 229, 1992

Endothelial cell
Is there a calcium paradox in isolated bovine aortic endothelial cells? **77**, 393, 1992

Endothelial ultrastructure
Transcellular openings through microvascular walls in acutely inflamed frog mesentery. **77**, 917, 1992

Endothelium
Role of endothelium in the responses of human intracranial arteries to a slight reduction of extracellular magnesium. **77**, 209, 1992
Actions of the phorbol ester, PMA, on ATP-induced fluctuations in cytoplasmic calcium in single isolated bovine aortic endothelial cells. **77**, 657, 1992
Electrical resistances of cultured bovine arterial

endothelium in solutions of various resistivities. 77, 741, 1992

Endplate
Diversity and homogeneity within endplates associated with physiologically identified static γ-axons in cat tenuissimus muscle. 77, 443, 1992

Enterocyte differentiation
Microvillus growth and M-cell formation in mouse Peyer's patch follicle-associated epithelial tissue. 77, 389, 1992
Appearance of phloridzin-sensitive glucose transport is not controlled at mRNA level in rabbit jejunal enterocytes. 77, 525, 1992

Epithelium
Liquid flow through monolayers of cultured Madin–Darby canine kidney cells. 77, 321, 1992

Erythrocyte membrane
Exercise-induced cholesterol depletion and Na^+, K^+-ATPase activities in human red cell membrane. 77, 933, 1992

Essential fatty acid
A diet enriched in essential fatty acids protects against the loss of lymphocytes which occurs in rats suffering from streptozotocin-induced diabetes. 77, 185, 1992

Exercise
Factors affecting the components of the alveolar CO_2 output–O_2 uptake relationship during incremental exercise in man. 77, 51, 1992
Indices for detection of changes in cardiorespiratory fitness during exercise training in man. 77, 65, 1992
Muscle glycogen and glucose uptake during exercise in humans. 77, 641, 1992
Evidence for a possible role of 5-hydroxytryptamine in the genesis of fatigue in man: administration of paroxetine, a 5-HT re-uptake inhibitor, reduces the capacity to perform prolonged exercise. 77, 921, 1992

Extracellular magnesium
Role of endothelium in the responses of human intracranial arteries to a slight reduction of extracellular magnesium. 77, 209, 1992

Fatigue
Evidence for a possible role of 5-hydroxytryptamine in the genesis of fatigue in man: administration of paroxetine, a 5-HT re-uptake inhibitor, reduces the capacity to perform prolonged exercise. 77, 921, 1992

Fatty acid
Segmental differences of short-chain fatty acid transport across guinea-pig large intestine. 77, 491, 1992

Feeding
Abdominal chemo- and mechanosensitivity in ruminants and its role in the control of food intake. 77, 27, 1992

Fetal potassium
Effects of the β-adrenergic agonist, ritodrine, and insulin on plasma potassium concentrations in fetal lambs. 77, 637, 1992

Fetus
Parathyroid hormone-related peptide increases urinary phosphate excretion in fetal lambs. 77, 377, 1992
Effect of cortisol on blood pressure and vascular reactivity in the ovine fetus. 77, 709, 1992

Fluid absorption
Evidence for simultaneous bidirectional fluid flux across synovial lining in knee joints of anaesthetized rabbits. 77, 513, 1992

Fluid transport
The effect of luminal flow in rabbit carotid artery on transmural fluid transport. 77, 553, 1992

FMRFamide
FMRFamide-related peptides potentiate transmission at the squid giant synapse. 77, 881, 1992

Force–velocity relation
Enhancement of mechanical performance of striated muscle by stretch during contraction. 77, 539, 1992

Fusimotor
Diversity and homogeneity within endplates associated with physiologically identified static γ-axons in cat tenuissimus muscle. 77, 443, 1992

Galactosaemia
Muscle and nerve dysfunction in rats with experimental galactosaemia. 77, 89, 1992
Polyol pathway-mediated changes in cardiac muscle contractile properties: studies in streptozotocin-diabetic and galactose-fed rats. 77, 829, 1992

Gap junction
Cytoplasmic bridges and gap junctions in an insect cell line (*Aedes albopictus*). 77, 903, 1992

Gastric blood flow
Interdigestive gastric blood flow: the relation to motor and secretory activities in conscious dogs. 77, 701, 1992

Gastric emptying
The role of cholecystokinin in inhibition of gastric emptying by peptone in the rat. 77, 693, 1992

Gastric motility
Interdigestive gastric blood flow: the relation to motor and secretory activities in conscious dogs. 77, 701, 1992

Gastric secretion
Interdigestive gastric blood flow: the relation to motor and secretory activities in conscious dogs. 77, 701, 1992

Gastrointestinal peptide
Effect of intraduodenal HCl and soybean extract on pancreatic juice secretion during atropinization and cold vagal blockade in calves. 77, 807, 1992

Glucagon
Enhanced electrogenic secretion *in vitro* by small intestine from glucagon-treated rats: implications for the diarrhoea of starvation. 77, 645, 1992
Hepatic regulation of renal function. 77, 663, 1992

Glucose
Muscle glycogen and glucose uptake during exercise in humans. 77, 641, 1992

Glucose transport
Appearance of phloridzin-sensitive glucose transport is not controlled at mRNA level in rabbit jejunal enterocytes. 77, 525, 1992
Rapid stimulatory effect of bradykinin on glucose

transport across the brush-border and basolateral membranes of rat jejunal enterocytes. 77, 913, 1992

Glycogen
Muscle glycogen and glucose uptake during exercise in humans. 77, 641, 1992

Glycogen depletion
Factors affecting the components of the alveolar CO_2 output–O_2 uptake relationship during incremental exercise in man. 77, 51, 1992

Heart rate
Indices for detection of changes in cardiorespiratory fitness during exercise training in man. 77, 65, 1992
Rate dependence of action potential duration and calcium current in isolated guinea-pig cardiocytes. 77, 615, 1992

Hippocampus
Electric field-induced orientation of rat hippocampal neurones *in vitro*. 77, 229, 1992
The Sharpey–Schafer Prize Lecture. The mechanism of induction of NMDA receptor-dependent long-term potentiation in the hippocampus. 77, 771, 1992

5-Hydroxytryptamine
Evidence for a possible role of 5-hydroxytryptamine in the genesis of fatigue in man: administration of paroxetine, a 5-HT re-uptake inhibitor, reduces the capacity to perform prolonged exercise. 77, 921, 1992

Hypothyroidism
Intracellular sodium and potassium activities of skeletal muscle fibres of hypothyroid rats. 77, 649, 1992

Hypoxia
Intracellular pH changes induced by hypoxia and anoxia in isolated sheep heart Purkinje fibres. 77, 165, 1992
The effects of metabolic inhibition and acidification on force production in the rat uterus. 77, 307, 1992

Inflammation
Avoidance of endotoxin-induced inflammation during studies of albumin clearance from caprine joints. 77, 839, 1992
Transcellular openings through microvascular walls in acutely inflamed frog mesentery. 77, 917, 1992

Inhibitory junction potential
Non-adrenergic, non-cholinergic inhibitory responses to nerve stimulation in rat colonic circular muscle. 77, 119, 1992

Insect
Cytoplasmic bridges and gap junctions in an insect cell line (*Aedes albopictus*). 77, 903, 1992

Insulin
Effects of the β-adrenergic agonist, ritodrine, and insulin on plasma potassium concentrations in fetal lambs. 77, 637, 1992

Insulin-like growth factor
Transfer of insulin-like growth factors I and II from plasma to lymph in young goats. 77, 575, 1992

Intestinal secretion
Enhanced electrogenic secretion *in vitro* by small intestine from glucagon-treated rats: implications for the diarrhoea of starvation. 77, 645, 1992

Intestinal transport
Confocal analysis of fluorescent bead uptake by mouse Peyer's patch follicle-associated M cells. 77, 929, 1992

Intestine
Microvillus growth and M-cell formation in mouse Peyer's patch follicle-associated epithelial tissue. 77, 389, 1992
Appearance of phloridzin-sensitive glucose transport is not controlled at mRNA level in rabbit jejunal enterocytes. 77, 525, 1992
Differences between sheep excreting sodium predominantly in their urine or in their faeces: the effect of changes in sodium intake. 77, 799, 1992

Intracellular ATP
Effects of intracellular ATP on calcium current in freshly dispersed single cells of guinea-pig portal vein. 77, 719, 1992

Intracellular calcium
Calcium oscillations in single isolated human vascular smooth muscle cells. 77, 205, 1992
Mobilization of calcium by the brief application of oxytocin and prostaglandin E_2 in single cultured human myometrial cells. 77, 293, 1992
Oxytocin-evoked repetitive rises of intracellular calcium in single cultured human myometrial cells. 77, 385, 1992
Is there a calcium paradox in isolated bovine aortic endothelial cells? 77, 393, 1992
Transients in intracellular free calcium in subconfluent and confluent cultures of a rat smooth muscle cell line 77, 749, 1992
Repetitive transients in intracellular Ca^{2+} in cultured human vascular smooth muscle cells. 77, 849, 1992

Intracellular ion activity
Intracellular sodium and potassium activities of skeletal muscle fibres of hypothyroid rats. 77, 649, 1992

Intracellular magnesium
Myoplasmic Mg^{2+} concentration in *Xenopus* muscle fibres at rest, during fatigue and during metabolic blockade. 77, 733, 1992

Intracellular pH
Intracellular pH changes induced by hypoxia and anoxia in isolated sheep heart Purkinje fibres. 77, 165, 1992
Measurement of intracellular pH in isolated bovine articular chondrocytes. 77, 521, 1992

Ion transport
Influence of extracellular bicarbonate on the short-circuit current and intracellular free calcium of human cultured sweat duct cells. 77, 863, 1992

Iron absorption
Regional characteristics of intestinal iron absorption in the guinea-pig. 77, 177, 1992

Isolated myocytes
Inactivation of Ca current during the action potential in guinea-pig ventricular myocytes. 77, 153, 1992

Jejunal enterocyte
Rapid stimulatory effect of bradykinin on glucose transport across the brush-border and basolateral

membranes of rat jejunal enterocytes. 77, 913, 1992

Joint afferent
Contribution of joint and muscle afferents to position sense at the human proximal interphalangeal joint. 77, 331, 1992

Joint receptor
Position sense at the proximal interphalangeal joint is distorted in patients with rheumatoid arthritis of finger joints. 77, 675, 1992

Kidney
Liquid flow through monolayers of cultured Madin–Darby canine kidney cells. 77, 321, 1992
Hepatic regulation of renal function. 77, 663, 1992
Differences between sheep excreting sodium predominantly in their urine or in their faeces: the effect of changes in sodium intake. 77, 799, 1992

Lactation
Effect of stage of lactation and milk accumulation on mammary cell differentiation in lactating bats. 77, 873, 1992

Laminin
A study of the expression of laminin in the spinal cord of the frog during development and regeneration. 77, 681, 1992

L-AP4 receptor
Evidence for presynaptic depression of monosynaptic excitation in neonatal rat motoneurones by (1S,3S)- and (1S,3R)-ACPD. 77, 529, 1992

Large intestine
Segmental differences of short-chain fatty acid transport across guinea-pig large intestine. 77, 491, 1992

Laryngeal resistance
Characteristics of augmented breaths provoked by almitrine bismesylate in cats. 77, 109, 1992

Liver
Hepatic regulation of renal function. 77, 663, 1992

Long-term potentiation
The Sharpey–Schafer Prize Lecture. The mechanism of induction of NMDA receptor-dependent long-term potentiation in the hippocampus. 77, 771, 1992

Lymph
Transfer of insulin-like growth factors I and II from plasma to lymph in young goats. 77, 575, 1992

Lymphocyte
A diet enriched in essential fatty acids protects against the loss of lymphocytes which occurs in rats suffering from streptozotocin-induced diabetes. 77, 185, 1992

M cell
Confocal analysis of fluorescent bead uptake by mouse Peyer's patch follicle-associated M cells. 77, 929, 1992

Mammary gland
The determination of short-term breast volume changes and the rate of synthesis of human milk using computerized breast measurement. 77, 79, 1992
Effect of stage of lactation and milk accumulation on mammary cell differentiation in lactating bats. 77, 873, 1992

Mammary secretory cell
Is the milk-fat-globule membrane a model for mammary secretory cell apical membrane? 77, 653, 1992

Mechano-electrical feedback
Mechanosensitive cells in the atrium of frog heart. 77, 213, 1992

Mechanoreceptor
Effects of lengthened immobilization on functional and histochemical properties of rabbit tibialis anterior muscle. 77, 433, 1992
Reflex vascular responses to changes in left ventricular pressures, heart rate and inotropic state in dogs. 77, 455, 1992

Mechanosensitive cell
Mechanosensitive cells in the atrium of frog heart. 77, 213, 1992

Medullary bone
Osteoclasts from medullary bone of egg-laying Japanese quail do not express the putative calcium 'receptor'. 77, 501, 1992

Microvascular permeability
Transcellular openings through microvascular walls in acutely inflamed frog mesentery. 77, 917, 1992

Microvillus membrane
Microvillus growth and M-cell formation in mouse Peyer's patch follicle-associated epithelial tissue. 77, 389, 1992

Milk secretion
The determination of short-term breast volume changes and the rate of synthesis of human milk using computerized breast measurement. 77, 79, 1992

Milk-fat-globule membrane
Is the milk-fat-globule membrane a model for mammary secretory cell apical membrane? 77, 653, 1992

Muscle
The G.L. Brown Prize Lecture. Potassium channels, metabolism and muscle. 77, 1, 1992
Factors affecting the components of the alveolar CO_2 output–O_2 uptake relationship during incremental exercise in man. 77, 51, 1992

Muscle adaptation
The protective effect of damaging eccentric exercise against repeated bouts of exercise in the mouse tibialis anterior muscle. 77, 757, 1992

Muscle afferent
Contribution of joint and muscle afferents to position sense at the human proximal interphalangeal joint. 77, 331, 1992

Muscle contraction
Muscle and nerve dysfunction in rats with experimental galactosaemia. 77, 89, 1992

Muscle damage
The protective effect of damaging eccentric exercise against repeated bouts of exercise in the mouse tibialis anterior muscle. 77, 757, 1992

Muscle fatigue
Myoplasmic Mg^{2+} concentration in *Xenopus* muscle fibres at rest, during fatigue and during metabolic blockade. 77, 733, 1992

Muscle function
Growth-related change in specific force but not in specific power of rat fast skeletal muscle. **77**, 505, 1992

Muscle growth
Growth-related change in specific force but not in specific power of rat fast skeletal muscle. **77**, 505, 1992

Muscle properties
Growth-related change in specific force but not in specific power of rat fast skeletal muscle. **77**, 505, 1992

Muscle spindle
Diversity and homogeneity within endplates associated with physiologically identified static γ-axons in cat tenuissimus muscle. **77**, 443, 1992

Myofilament
Enhancement of mechanical performance of striated muscle by stretch during contraction. **77**, 539, 1992

Myometrium
Oxytocin-evoked repetitive rises of intracellular calcium in single cultured human myometrial cells. **77**, 385, 1992

Myosin
The effect of $_{i}$ and $_{o}$ on Ca^{2+} mobilization in the rat aortic smooth muscle cell line A7r5. **77**, 627, 1992

Myosin cross-bridge
Enhancement of mechanical performance of striated muscle by stretch during contraction. **77**, 539, 1992

Nerve conduction
Muscle and nerve dysfunction in rats with experimental galactosaemia. **77**, 89, 1992

Nerve injury
Pathobiological reactions of C-fibre primary sensory neurones to peripheral nerve injury. **77**, 405, 1992

Neurite guidance
Electric field-induced orientation of rat hippocampal neurones *in vitro*. **77**, 229, 1992

Nitric oxide
Inhibition in the rat of nitric oxide synthesis *in vivo* does not attenuate the hypotensive action of acetylcholine, ATP or bradykinin. **77**, 285, 1992
Evidence for involvement of nitric oxide in the non-adrenergic non-cholinergic (NANC) relaxation of human lower oesophageal sphincter muscle strips. **77**, 509, 1992

NMDA receptor
The Sharpey–Schafer Prize Lecture. The mechanism of induction of NMDA receptor-dependent long-term potentiation in the hippocampus. **77**, 771, 1992

Non-adrenergic, non-cholinergic response
Non-adrenergic, non-cholinergic inhibitory responses to nerve stimulation in rat colonic circular muscle. **77**, 119, 1992

Noradrenaline
Prostaglandin E_2 in adipose tissue extracellular fluid of sheep. **77**, 363, 1992

Olfaction
An olfactory–submandibular salivary reflex in humans. **77**, 221, 1992

Osteoclast
Osteoclasts from medullary bone of egg-laying Japanese quail do not express the putative calcium 'receptor'. **77**, 501, 1992

Oxygen consumption
Indices for detection of changes in cardiorespiratory fitness during exercise training in man. **77**, 65, 1992

Oxytocin
Mobilization of calcium by the brief application of oxytocin and prostaglandin E_2 in single cultured human myometrial cells. **77**, 293, 1992
Oxytocin-evoked repetitive rises of intracellular calcium in single cultured human myometrial cells. **77**, 385, 1992

Pancreatic secretion
Interaction between secretin and cholecystokinin-octapeptide in the exocrine rat pancreas *in vivo* and *in vitro*. **77**, 191, 1992
Effect of intraduodenal HCl and soybean extract on pancreatic juice secretion during atropinization and cold vagal blockade in calves. **77**, 807, 1992

Parathyroid hormone
The effects in the rat of two fragments of parathyroid hormone-related protein on uterine contractions *in situ*. **77**, 481, 1992

Parathyroid hormone-related peptide
Parathyroid hormone-related peptide increases urinary phosphate excretion in fetal lambs. **77**, 377, 1992

Parathyroid hormone-related protein
The effects in the rat of two fragments of parathyroid hormone-related protein on uterine contractions *in situ*. **77**, 481, 1992

Parietal cortex
Electrophysiological influences of the parietal cortex and dorso-medial thalamic nucleus on the prefrontal cortex of the cat. **77**, 351, 1992

Permeability
Electrical resistances of cultured bovine arterial endothelium in solutions of various resistivities. **77**, 741, 1992

pH
The effects of metabolic inhibition and acidification on force production in the rat uterus. **77**, 307, 1992

Phorbol ester
Actions of the phorbol ester, PMA, on ATP-induced fluctuations in cytoplasmic calcium in single isolated bovine aortic endothelial cells. **77**, 657, 1992

Phosphate
Parathyroid hormone-related peptide increases urinary phosphate excretion in fetal lambs. **77**, 377, 1992

Pial artery
Role of endothelium in the responses of human intracranial arteries to a slight reduction of extracellular magnesium. **77**, 209, 1992

Plasma clearance
Transfer of insulin-like growth factors I and II from plasma to lymph in young goats. 77, 575, 1992
Position sense
Contribution of joint and muscle afferents to position sense at the human proximal interphalangeal joint. 77, 331, 1992
Position sense at the proximal interphalangeal joint is distorted in patients with rheumatoid arthritis of finger joints. 77, 675, 1992
Potassium
Effect of potassium on ventilation in the rhesus monkey. 77, 217, 1992
Potassium channel
The G.L. Brown Prize Lecture. Potassium channels, metabolism and muscle. 77, 1, 1992
Potassium transport
Is the milk-fat-globule membrane a model for mammary secretory cell apical membrane? 77, 653, 1992
Pressure
Liquid flow through monolayers of cultured Madin–Darby canine kidney cells. 77, 321, 1992
Presynaptic depression
Evidence for presynaptic depression of monosynaptic excitation in neonatal rat motoneurones by (1S,3S)- and (1S,3R)-ACPD. 77, 529, 1992
Primary afferent fibre
Pathobiological reactions of C-fibre primary sensory neurones to peripheral nerve injury. 77, 405, 1992
Prize lectures
The G.L. Brown Prize Lecture. Potassium channels, metabolism and muscle. 77, 1, 1992
The Sharpey–Schafer Prize Lecture. The mechanism of induction of NMDA receptor-dependent long-term potentiation in the hippocampus. 77, 771, 1992
Prolactin
Prolactin secretion in sheep after dehydration followed by restraint or administration of ovine corticotrophin-releasing factor. 77, 357, 1992
Prostaglandin E_2
Mobilization of calcium by the brief application of oxytocin and prostaglandin E_2 in single cultured human myometrial cells. 77, 293, 1992
Prostaglandin E_2 in adipose tissue extracellular fluid of sheep. 77, 363, 1992
Protein kinase
Modulation of voltage-dependent calcium current in *Helix aspersa* buccal neurones by serotonin and protein kinase C activators. 77, 891, 1992
Protein meal
The role of cholecystokinin in inhibition of gastric emptying by peptone in the rat. 77, 693, 1992
Pulmonary circulation
An analysis of the action of an analogue of almitrine bismesylate in the rat model of hypoxic lung disease. 77, 819, 1992
Receptor
Abdominal chemo- and mechanosensitivity in ruminants and its role in the control of food intake. 77, 27, 1992
Regeneration
A study of the expression of laminin in the spinal cord of the frog during development and regeneration. 77, 681, 1992
Renal epithelium
Primary culture of collecting duct cell epithelium from neonate rabbit kidney in monolayer. 77, 129, 1992
Respiration
The effect of tachykinins on sheep bronchomotor tone. 77, 471, 1992
Review articles
Abdominal chemo- and mechanosensitivity in ruminants and its role in the control of food intake. 77, 27, 1992
Reflex effects on the coronary circulation. 77, 243, 1992
Pathobiological reactions of C-fibre primary sensory neurones to peripheral nerve injury. 77, 405, 1992
Enhancement of mechanical performance of striated muscle by stretch during contraction. 77, 539, 1992
Hepatic regulation of renal function. 77, 663, 1992
Rumen
Abdominal chemo- and mechanosensitivity in ruminants and its role in the control of food intake. 77, 27, 1992
Influence of short-chain fatty acids on ammonia absorption across the rumen wall in sheep. 77, 369, 1992
Involvement of carbonic anhydrase in ammonia flux across rumen mucosa *in vitro*. 77, 517, 1992
Salivary secretion
An olfactory–submandibular salivary reflex in humans. 77, 221, 1992
Secretin
Interaction between secretin and cholecystokinin-octapeptide in the exocrine rat pancreas *in vivo* and *in vitro*. 77, 191, 1992
Cholinergic mechanisms for secretin release after intraduodenal alkalinization in the anaesthetized rabbit. 77, 601, 1992
Serotonin
Modulation of voltage-dependent calcium current in *Helix aspersa* buccal neurones by serotonin and protein kinase C activators. 77, 891, 1992
Sheep
Influence of short-chain fatty acids on ammonia absorption across the rumen wall in sheep. 77, 369, 1992
The effect of tachykinins on sheep bronchomotor tone. 77, 471, 1992
Short-chain fatty acid
Influence of short-chain fatty acids on ammonia absorption across the rumen wall in sheep. 77, 369, 1992
Skeletal muscle
Intracellular sodium and potassium activities of skeletal muscle fibres of hypothyroid rats. 77, 649, 1992
Skeletal muscle fibre
Myoplasmic Mg^{2+} concentration in *Xenopus* muscle fibres at rest, during fatigue and during metabolic blockade. 77, 733, 1992
Smooth muscle
Evidence for involvement of nitric oxide in the non-

adrenergic non-cholinergic (NANC) relaxation of human lower oesophageal sphincter muscle strips. 77, 509, 1992
Effects of intracellular ATP on calcium current in freshly dispersed single cells of guinea-pig portal vein. 77, 719, 1992
Transients in intracellular free calcium in sub-confluent and confluent cultures of a rat smooth muscle cell line 77, 749, 1992
Repetitive transients in intracellular Ca^{2+} in cultured human vascular smooth muscle cells. 77, 849, 1992

Sodium
Differences between sheep excreting sodium predominantly in their urine or in their faeces: the effect of changes in sodium intake. 77, 799, 1992

Sodium appetite
Intracerebroventricular angiotensin II-induced thirst and sodium appetite in rat are blocked by the AT_1 receptor antagonist, Losartan (DuP 753), but not by the AT_2 antagonist, CGP 42112B. 77, 761, 1992

Sodium–calcium exchange
Evidence for Na^{2+}–Ca^{2+} exchange and Ca^{2+}-induced Ca^{2+} release in a cultured vascular smooth muscle cell line from the rat. 77, 141, 1992

Sodium channel
Primary culture of collecting duct cell epithelium from neonate rabbit kidney in monolayer. 77, 129, 1992

Sodium–hydrogen exchange
Measurement of intracellular pH in isolated bovine articular chondrocytes. 77, 521, 1992

Sodium, potassium-ATPase
Exercise-induced cholesterol depletion and Na^+, K^+-ATPase activities in human red cell membrane. 77, 933, 1992

Spinal cord
A study of the expression of laminin in the spinal cord of the frog during development and regeneration. 77, 681, 1992

Squid
FMRFamide-related peptides potentiate transmission at the squid giant synapse. 77, 881, 1992

Starvation
Enhanced electrogenic secretion *in vitro* by small intestine from glucagon-treated rats: implications for the diarrhoea of starvation. 77, 645, 1992

Stress
Prolactin secretion in sheep after dehydration followed by restraint or administration of ovine corticotrophin-releasing factor. 77, 357, 1992

Submandibular gland
An olfactory–submandibular salivary reflex in humans. 77, 221, 1992

Synaptic transmission
FMRFamide-related peptides potentiate transmission at the squid giant synapse. 77, 881, 1992

Synovial joint
Evidence for simultaneous bidirectional fluid flux across synovial lining in knee joints of anaesthetized rabbits. 77, 513, 1992

Synovium
Avoidance of endotoxin-induced inflammation during studies of albumin clearance from caprine joints. 77, 839, 1992

Tachykinin
The effect of tachykinins on sheep bronchomotor tone. 77, 471, 1992

Thirst
Intracerebroventricular angiotensin II-induced thirst and sodium appetite in rat are blocked by the AT_1 receptor antagonist, Losartan (DuP 753), but not by the AT_2 antagonist, CGP 42112B. 77, 761, 1992

Tooth
Modulation by peripheral conditioning stimuli of the responses of trigeminal brain stem neurones and of the jaw opening reflex to tooth pulp stimulation in chronically prepared, anaesthetized cats. 77, 343, 1992

Transient change
Repetitive transients in intracellular Ca^{2+} in cultured human vascular smooth muscle cells. 77, 849, 1992

Trigeminal nucleus
Modulation by peripheral conditioning stimuli of the responses of trigeminal brain stem neurones and of the jaw opening reflex to tooth pulp stimulation in chronically prepared, anaesthetized cats. 77, 343, 1992

Unidirectional flux
Segmental differences of short-chain fatty acid transport across guinea-pig large intestine. 77, 491, 1992

Unitary activity
Electrophysiological influences of the parietal cortex and dorso-medial thalamic nucleus on the prefrontal cortex of the cat. 77, 351, 1992

Uterus
The effects of metabolic inhibition and acidification on force production in the rat uterus. 77, 307, 1992
The effects in the rat of two fragments of parathyroid hormone-related protein on uterine contractions *in situ*. 77, 481, 1992

Vagal blockade
Effect of intraduodenal HCl and soybean extract on pancreatic juice secretion during atropinization and cold vagal blockade in calves. 77, 807, 1992

Vagus nerve
An excitatory body–antral reflex in the sheep abomasum. 77, 565, 1992

Vascular resistance
Effects of lengthened immobilization on functional and histochemical properties of rabbit tibialis anterior muscle. 77, 433, 1992
Reflex vascular responses to changes in left ventricular pressures, heart rate and inotropic state in dogs. 77, 455, 1992

Vascular smooth muscle
Evidence for Na^{2+}–Ca^{2+} exchange and Ca^{2+}-induced Ca^{2+} release in a cultured vascular smooth muscle cell line from the rat. 77, 141, 1992
Calcium oscillations in single isolated human vascular smooth muscle cells. 77, 205, 1992
The effects of Na^+–K^+–Cl^- co-transport and Cl^-–HCO_3^-–exchange blockade on the membrane

potential and intracellular chloride levels of rat arterial smooth muscle, *in vitro*. **77**, 857, 1992

Vasodilatation
Inhibition in the rat of nitric oxide synthesis *in vivo* does not attenuate the hypotensive action of acetylcholine, ATP or bradykinin. **77**, 285, 1992

Vasodilator flare
An investigation into the extent to which flare in human skin crosses the mid-line. **77**, 765, 1992

Vasopressin
Inhibition of vasopressin and aldosterone release by atrial natriuretic peptide in conscious rabbits. **77**, 587, 1992

Ventilation
Effect of potassium on ventilation in the rhesus monkey. **77**, 217, 1992
An analysis of the action of an analogue of almitrine bismesylate in the rat model of hypoxic lung disease. **77**, 819, 1992

Ventricular pressure
Coronary flow and left ventricular pressure during diastole in the anaesthetized dog. **77**, 397, 1992

Ventricular receptor
Effects of lengthened immobilization on functional and histochemical properties of rabbit tibialis anterior muscle. **77**, 433, 1992
Reflex vascular responses to changes in left ventricular pressures, heart rate and inotropic state in dogs. **77**, 455, 1992

Ventricular volume
Coronary flow and left ventricular pressure during diastole in the anaesthetized dog. **77**, 397, 1992

Visceral reflex
Reflex effects on the coronary circulation. **77**, 243, 1992
